## Telemetry GPS Module Installation Instructions

Covers Part #6551

**Note:** Traxxas models may have some Telemetry-ready parts installed from the factory. Please inspect the model before installation.

**Required for Telemetry GPS operation:**

- TQi radio system with #6510 docking base
- Traxxas Link receiver #6518
- Telemetry Expander #6550

- Apple iOS mobile device (visit [Traxxas.com](http://Traxxas.com) for a list of current compatible devices)
- Traxxas Link App (latest version available free from the Apple App Store)

**B** Install the GPS module, aligning the GPS connector with the GPS port. The GPS module snaps into place when properly installed.

**Note:** Before reinstalling the Expander cover, power up the system and verify that the GPS has linked, indicated by a solid green LED on the Expander. If the LED is blinking red, there is an error in the system. Visit [Traxxas.com/telemetry](http://Traxxas.com/telemetry) for complete information and instructions on compatible devices and using the Traxxas Link App and the Telemetry Expander to capture and display real-time telemetry.

**Note:** Before sealing the cover on the Expander, ensure that the blue O-ring is properly seated in the groove.
