Headless Mode

Fly like a veteran, whether you be a novice or expert flyer. Initiate in Expert Mode for more sensitive transmitter and drone response.

1920 X 1080 Camera

For high definition photography and videography, we paired our H216A with a 1080p camera. Crystal clear world-scaping is right at your finger tips.

AUTOMATIC TAKE-OFF

A simple press of a button allows the H216A to automatically take flight Paired with the Waypoint function, the drone can complete a given flight plan by itself.

AUTOMATIC RETURN HOME

If the 2.4GHz flight control connection between the drone and transmitter is broken, or the drones' power levels are too low, the H216A will automatically return home.

AUTOMATIC HOVER

Precise automatic hovering A streamlined body, combined with powerful engines and a stable flight control system create a superior hover capability
