

ESC 30A/XT60 connector

The image shows a white plastic motor housing for a Kavan RC motor. The housing is open, revealing the internal components. A yellow XT60 connector is plugged into the ESC. A black battery is inserted into the motor's battery tray. The battery has "KAVAN 30A BEC" printed on it. The motor housing has "kavanrc.com" printed on the side. A propeller is attached to the motor's output shaft. The background is a light blue gradient with white geometric patterns.
